

Project Update - 10/21/24

Around October 19, Shakira postponed all the USA concert dates to 2025. Shakira concert demand was so high in South America that she added more concert dates there and pushed back the USA concerts. Originally, her first concert in the USA was going to be in early November. Now Shakira's first concert in the USA will be in May. This development also caused all the previous concert tickets to be cancelled and new concert tickets are set to go on sale on Wednesday at noon (EST).

We will be using the data we obtained from the previous week for the project. Running the Ticketmaster API part of the code in current time will not work because the outputs will come out as 'canceled'. Also the hotel dates of the code will be based on the original tour concert dates in America.
